DETAILED ACTION

1. The amendment filed on 9 January 2006 have been received and entered. Claims 42-68 are pending in the application.

EXAMINER'S AMENDMENT

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. William Rowland (Reg. No. 30,888) on 24 March 2006.

3. The application is amended as follows:

4. Claim 42 is amended to read:

Claim 42. A method of generating a user interface on a display for setting operation conditions through a plurality of entry screens, the method comprising:

displaying one of the plurality of entry screens;

receiving input on the displayed entry screen from a user to set operation conditions;

if the user selects another entry screen, displaying the selected entry screen instead of the current displayed entry screen; and

displaying a window which shows a plurality of setting results set on the plurality of entry screens, said setting results set on the current displayed entry screen being shown to be distinguished from the other setting results.

5. Claim 48 is amended to read:

Claim 48. A method as claimed in claim 42, wherein one of the entry screens is displayed when the user specifies one of the setting results on the window, said displayed entry screen being associated with the specified setting result.

6. Claim 57 is amended to read:

Claim 57. The apparatus as claimed in claim 51, wherein one of the entry screens is displayed when the user specifies one of the setting results on the window, said displayed entry screen being associated with the specified setting result.

7. Claim 60 is amended to read:

Claim 60. A computer-readable medium having computer executable instructions for performing steps comprising:

displaying one of a plurality of entry screens;
receiving input on the displayed entry screen from a user to set operation conditions;
if the user selects another entry screen, displaying the selected entry screen instead of the current displayed entry screen; and

displaying a window which shows a plurality of setting results set on the plurality of entry screens, said setting results set on the current displayed entry screen being shown to be distinguished from the other setting results.

8. Claim 66 is amended to read:

Claim 66. The computer-readable medium as claimed in claim 60, wherein one of the entry screens is displayed when the user specifies one of the setting results on the window, said displayed entry screen being associated with the specified setting result.

Allowable Subject Matter

9. Claims 42-68 are allowed.

10. The following is an examiner's statement of reasons for allowance: The present invention teaches a user interface for setting a plurality of items associated with operation conditions of an image processing apparatus such as a printer or copier via entry screens. Each of the independent claims identifies the distinct feature of displaying a window which shows a plurality of setting results set on the plurality of entry screens, the setting results set on the current displayed entry screen being shown to be distinguished from the other setting results. The closest prior art, Ono et al. U.S. Patent 6,295,136 teaches a user interface that displays a plurality of entry screens for receiving user input to set operation conditions and allows the user to select another one of the plurality of entry screens, and displays the selected entry screen accordingly. However, the prior art fails to teach that a window shows a summary or confirmation list of a

plurality of setting results that have been set on the plurality of entry screens, with the setting results set on the currently displayed entry screen being visually distinguished from the other setting results. Thus, the prior art fails to anticipate or render the above limitations obvious.

11. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
